Results
=======

Package          Operation Target          Status
orig             generate  ---             OK (0.0s)
orig             configure ---             OK (1.4s)
orig             build     all             OK (40.7s)
orig             build     install         OK (0.4s)
orig             test      demo            FAIL (1 0.2s 7L)
```

Normally, an operation is indicated as having a status of either "OK" or
"FAIL". A status of "?" indicates that the operation could not be performed
for some reason (e.g., due to an earlier error or being a manual step).
The time (in seconds) required for an operation is denoted by an expression
consisting of a number followed by the letter "s" (e.g., "5.0s").
In the case of a test that consists of multiple test cases, the number of
failed test cases and total number of test cases is expressed as a fraction
(e.g., "10/50" means 10 test cases failed out of 50 test cases in total).
The length (in lines) of the log file generated by an operation is denoted by
an expression consisting of a number followed by the letter "L" (e.g., "10L").
To ascertain the reason for the failure of an operation, check the contents
of the log file provided.

Legend
======

Package: orig
    The code exactly as submitted by the student.
Build target: all
    Build the project.
Build target: install
    Install the project.
Test target: demo
    Run the demo program.

```
1   Running venation program
2   terminate called after throwing an instance of 'std::ios_base::failure'
3     what():  file_stream_device: failed to open file for reading
4   /tmp/assignment_precheck-jules@ugls14.ece.uvic.ca-14286-NHhP3JWF/package-orig/in
5   stall/bin/demo: line 16: 15482 Aborted                    (core dumped)
6   $venation_program $options
7   ERROR: venation program failed
